- Air pollution control equipment (ESP rebuilds, upgrades, new builds).
- Serves power, pulp & paper, petrochemical, rock products, and steel sectors.
- Offers design, engineering, spare parts, and field service.

- Material handling pipe
- Abrasion-resistant materials: Cast basalt, alumina ceramic, and silicon carbides for wear protection in pipelines, and chutes
- Custom design & Engineering services
- Boiler Tube Leak Detection
- Applications – oil & gas, steel mills & foundries, cement plants, mining, power generation, chemical processing

- Steam valves up to 4"
- In-line Repairable
- Globe, ball, gate, check, throttling, & urea valves
- Lowest lifecycle cost in the industry

- Stokers for Coal, Wood, RDF and Biomass
- Low NOx Burners
- Ash Systems and Rotary Steel Feeders
- Renewal parts & other OEMs
- Under Throw Feeders, Combination Feeders
- Field Service & Inspections Stoker Rebuilds & Retrofits

- Flame & gas detection & systems
- Engineering services
- Live testing in Savage, MN
- Field Service
- Applications – oil & gas, petrochemical, power generation, LNG, food & beverage, wastewater, hazardous environments & more

- Custom engineering
- Air cooled heat exchangers
- ECO-Tac Air cooled heat exchangers
- Applications – OEM gas turbine, power generation, petrochemical, refinery, gas transmission, process

- Raw Water Pretreatment
- Boiler and Cooling Tower Make-Up
- Condensate Treatment
- Wastewater for Power, Industrial, Petrochemical, Food & Beverage
- Oil Separation and Brine Treatment
- Complete Systems, Retrofits, Parts, Controls and Service

- Nearly 100-year legacy
- Heavy-duty belt conveyor systems for high temp industrial environments including steel mills, cement plants, and foundries, power plants
- Thermal energy storage for storing & recovering heat in industrial applications
- Heavy-duty conveying systems for hard-to handle materials

- Knife gate valves American Made
- 2" to 40"
- One-piece urethane line that protects the epoxy coated body
- Simple design, tight shutoff and maintainability
- Applications: slurries, bottom ash transport lines, limestone dewatering bins, wet fly ash service, and sludge disposal

- Butterfly valves, various types
- Engineering services, custom designs, replacement parts, maintenance service, testing
- Applications – oil & gas, chemical processing, aerospace, air separation & cryogenic, pulp & paper, conventional power, water/wastewater, and many more

- Valmet Boiler Diagnostic System, Camera & Software
- Applications – coal power plants, HRSG plants, waste-to-energy, steel mills, chemical plants, cement production

- Yuba and Ecolaire 100-year legacy in Power Generation
- Provides custom design, on-site engineering, and manufacturing of heavy heat transfer equipment and process solutions.
- Feedwater heaters, glycol heaters, surface condensers, replacement tube bundles, exact-spec replacement parts
- Applications- Oil and gas, power sector: thermal, nuclear and geothermal

- Premier manufacturer of critical static process equipment: Reactors, Pressure Vessels and Column Heat Exchangers
- Applications: Oil and Gas, Petrochemicals, fertilizers and hydrogen sector
